

Kayla is fighting a life-threatening cancer

Kayla is a very happy and lively 5-year-old from Norwich. She loves Minnie Mouse, Frozen, Peppa Pig and all things pink! She adores her big brothers and loves spending time with them.

In May 2021 Kayla was diagnosed with high-risk neuroblastoma, a rare and aggressive childhood cancer that has a 40-50% chance of long-term survival at diagnosis. Sadly, just as Kayla finished frontline treatment in October 2022, scans showed disease progression.

Kayla's family are fundraising for further treatment, either to get their daughter into remission or to try and keep the cancer away if her treatment goes to plan.  [solvingkidscancerkayla](https://www.facebook.com/solvingkidscancerkayla)

You can give Kayla hope

To donate online, visit

solvingkidscancer.org.uk/children/kayla

To donate by text, send the word KAYLA followed by any whole amount (up to £20) to **70085**

As an example, texting KAYLA 5 would cost £5 plus your standard network text charge

DONATE

If you would like to fundraise for Kayla, please contact Solving Kids' Cancer UK for support at fundraising@solvingkidscancer.org.uk or on **020 7284 0800**.

Funds raised will go towards helping Kayla and her family. If Kayla no longer needs the funds or is in remission five years post the end of successful treatment, the funds will be used to support other children and families affected by neuroblastoma through Solving Kids' Cancer UK's activities. For children with high-risk neuroblastoma, like Kayla, the survival rate is much lower than other childhood cancers. Upon relapse, this rate reduces even further. Solving Kids' Cancer UK is a registered charity in England and Wales 1135601, and in Scotland SCO45094.
