

Rio is fighting a life-threatening cancer

Rio is a happy, playful and energetic two-year-old who adores cars and spending time with his big sister Lillyrose!

In August 2023 Rio was diagnosed with high-risk neuroblastoma, an aggressive childhood cancer that has a 40-50% chance of long-term survival at diagnosis.

Rio's family are fundraising for further treatment, either to get their son into remission or to try and keep the cancer away if his frontline treatment does go to plan.

If you would like to fundraise for Rio, please contact Solving Kids' Cancer UK for support at fundraising@solvingkidscancer.org.uk or on **020 7284 0800**.

Funds raised will go towards helping Rio and his family. If Rio no longer needs the funds or is in remission five years post the end of successful treatment, the funds will be used to support other children and families affected by neuroblastoma through Solving Kids' Cancer UK's activities. For children with high-risk neuroblastoma, like Rio, the survival rate is much lower than other childhood cancers. Upon relapse, this rate reduces even further. Solving Kids' Cancer UK is a registered charity in England and Wales 1135601, and in Scotland SCO45094.
