

# Appeal to raise £105,000 for Annabel's cancer treatment in America by October 2024

Annabel is a happy, smiling 5-year-old who wants to be a nurse when she grows up. Her family just wants her to be able to grow up.

In April 2023, aged 4, she was diagnosed with Stage 4 high-risk neuroblastoma, a rare and aggressive childhood cancer that has a 40-50% chance of long-term survival at diagnosis.

Annabel's family are fundraising to enrol her on a study in the US to access the drug DFMO, aimed at preventing future relapse, which is not currently available in the UK.
